

**Listing of the Claims:**

1. (Currently Amended) A hand-held electronic device comprising:  
memory configured to store image data within the hand-held electronic device;  
a transmitter configured to provide a wireless link with a remote electronic display;  
[[and]]  
a controller coupled to the memory and to the transmitter wherein the controller is configured to provide the image data in an Internet protocol format and wherein the transmitter is configured to transmit the image data over the wireless link in the Internet protocol format; and  
a user interface coupled to the controller wherein the user interface is configured to accept user input of pointer commands and wherein the controller and transmitter are configured to transmit the pointer commands over the wireless link to the remote electronic display.
2. (Canceled)
3. (Currently Amended) A hand-held electronic device according to Claim 1[[2]] wherein the pointer commands are transmitted in the Internet protocol format.
4. (Currently Amended) A hand-held electronic device according to Claim 1[[2]] wherein the pointer commands are transmitted in a format other than the Internet protocol format.
5. (Original) A hand-held electronic device according to Claim 1 wherein the transmitter comprises a short range transmitter, the hand-held electronic device further comprising a long range transceiver configured to provide long-range communications.
6. (Original) A hand-held electronic device according to Claim 1 wherein the

transmitter is configured to provide a wireless link according to at least one of a WiFi standard, a BlueTooth standard, and/or an infrared standard.

7. (Original) A hand-held electronic device according to Claim 1 wherein the Internet protocol format comprises at least one of HTML and/or XML.

8. (Original) A hand-held electronic device according to Claim 1 wherein the controller further provides at least one of a contacts database, a calendar, an e-mail transmitter/receiver, a digital music player, a task list, and/or a wireless internet browser.

9. (Original) A hand-held electronic device according to Claim 1 wherein the image data comprises a slide presentation.

10. (Original) An electronic display device comprising:  
a display configured to display electronic data;  
an Internet protocol browser, wherein the Internet protocol browser is configured to receive image data and pointer commands from a hand-held electronic device without a wired coupling to the hand-held electronic device, wherein the image data is received at the Internet protocol browser in an Internet protocol format, and wherein the Internet protocol browser is configured to provide the image data visually using the display responsive to the pointer commands from the hand-held electronic device.

11. (Original) An electronic display device according to Claim 10 wherein the display comprises at least one of a monitor and/or a projector.

12. (Original) An electronic display device according to Claim 10 wherein the pointer commands are received at the Internet protocol browser in the Internet protocol format.

13. (Original) An electronic display device according to Claim 10 wherein the pointer commands are received at the Internet protocol browser in a format other than the Internet protocol format.

14. (Original) An electronic display device according to Claim 10 wherein the Internet protocol format comprises at least one of HTML and/or XML.

15. (Original) An electronic display device according to Claim 10 wherein the image data comprises a slide presentation.

16. (Currently Amended) A method of providing a visual presentation using a hand-held electronic device, the method comprising:

storing image data within the hand-held electronic device;  
providing the image data in an Internet protocol format;[[ and]]  
transmitting the image data over a wireless link to a remote electronic display in the Internet protocol format;  
accepting user input of pointer commands; and  
transmitting the pointer commands over the wireless link to the remote electronic display.

17. (Canceled)

18. (Currently Amended) A method according to Claim 16[[17]] wherein the pointer commands are transmitted in the Internet protocol format.

19. (Currently Amended) A method according to Claim 16[[17]] wherein the pointer commands are transmitted in a format other than the Internet protocol format.

20. (Original) A method according to Claim 16 wherein the image data is

transmitted using a short range protocol, the method further comprising:  
providing long-range wireless communications.

21. (Original) A method according to Claim 16 wherein transmitting the image data comprises transmitting the image data using at least one of a WiFi standard, a BlueTooth standard, and/or an infrared standard.

22. (Original) A method according to Claim 16 wherein the Internet protocol format comprises at least one of HTML and/or XML.

23. (Original) A method according to Claim 16 further comprising:  
providing at least one of a contacts database, a calendar, an e-mail transmitter/receiver, a digital music player, a task list, and/or a wireless internet browser.

24. (Original) A method according to Claim 16 wherein the image data comprises a slide presentation.

25. (Original) A method of operating an electronic display device, the method comprising:

receiving image data and pointer commands from a hand-held electronic device without a wired coupling to the hand-held electronic device, wherein the image data is received in an Internet protocol format; and

providing the image data visually responsive to the pointer commands.

26. (Original) A method according to Claim 25 wherein providing the image data comprises providing the image data using at least one of a monitor and/or a projector.

27. (Original) A method according to Claim 25 wherein the pointer commands are received at the Internet protocol browser in the Internet protocol format.

28. (Original) A method according to Claim 25 wherein the pointer commands are received at the Internet protocol browser in a format other than the Internet protocol format.

29. (Original) A method according to Claim 25 wherein the Internet protocol format comprises at least one of HTML and/or XML.

30. (Original) A method according to Claim 25 wherein the image data comprises a slide presentation.

31. (New) A hand-held electronic device according to Claim 1 wherein the transmitter is configured to provide the wireless link with the remote electronic display including an Internet protocol browser, wherein the pointer commands are used to control a pointer function of the Internet protocol browser of the remote electronic display, and wherein the controller and transmitter are configured to transmit the pointer commands over the wireless link to the remote electronic display to control the pointer function of the Internet protocol browser.

32. (New) A hand held electronic device according to Claim 31 wherein the controller is configured to act as a server with respect to the browser of the remote electronic display acting as a client.

33. (New) An electronic display device according to Claim 10 wherein the pointer commands are used to control a pointer function of the Internet protocol browser.

34. (New) An electronic display device according to Claim 33 wherein the browser is configured to act as a client with respect to a controller of the hand held electronic device acting as a server.

35. (New) A method according to Claim 16 wherein the remote electronic display includes an Internet protocol browser, wherein the pointer commands are used to control a pointer function of the Internet protocol browser of the remote electronic device, and wherein the pointer commands are transmitted over the wireless link to the remote electronic display to control the pointer function of the Internet protocol browser.

36. (New) A method according to Claim 35 wherein the hand held electronic device is configured to act as a server with respect to the browser of the remote electronic display acting as a client.

37. (New) A method according to 25 wherein the electronic display device includes an Internet protocol browser, and wherein the pointer commands are used to control a pointer function of an Internet protocol browser of the electronic display device.

38. (New) A method according to Claim 37 wherein the Internet protocol browser is configured to act as a client with respect to a controller of the hand held electronic device acting as a server.
